4. Study the items whose numbers you circled in the questionnaire. Look for key themes or organizational characteristics you might consider for improvement.

5. From the Four Customer Service Dimensions outlined and defined on page 9, select one or more dimensions that you believe would lead to improvement of the organization's customer service with focused effort and change. For each action that you concentrate on, make a thorough implementation plan. Consider these questions:

What specifically will be done?

Who (especially you) will take action?

When will you take action and expect results?

Where will the action take place?

Why will you employ this approach, for what desired outcomes?

How much do you expect to achieve as a result of the action?

Remember that action planning is incomplete unless it includes a system of measuring progress against goals. Repeat these steps for each dimension of the Customer Service Organizational Assessment in which there lower ratings. Improving the organizations Customer Service Capability is an investment in staying ahead of the curve. It can mean faster response to shifting customer expectations, a more energized workplace, and better long-term financial viability.
